

Features

- Universal AC input / Full range
- Withstand 300VAC surge input for 5 seconds
- Low profile: 26mm
- High efficiency up to 92%
- Built-in active PFC function
- Fanless design, cooling by free air convection
- Protections: Short circuit / Overload / Over voltage / Over temperature
- Output voltage adjustable: DIP switch
- Redundant function(R Type)
- Operating altitude up to 5000 meters(Note 9)
- Conformal coating
- LED indicator for power on
- 3 years warranty

Applications

- LED signage display
- Moving sign
- LED channel letter
- LED TV wall

Description

The UDP-300 series is a 300W LED display power solution. The ultra-low-profile design allows the sign module to be slim in height and weight. It greatly simplifies the delivery and installation processes. Thanks to its high efficiency and energy-saving performance, the series delivers effective energy savings. It is suitable for LED signage displays, moving signs, LED channel letters, LED TV walls, etc.

NOTE			
1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25℃ of ambient temperature. 2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor. 3. Tolerance : line regulation and load regulation. 4. Derating may be needed under low input voltages. Please check the static characteristics for more details. 5. Length of set up time is measured at cold first start. Turning ON/OFF the power supply may lead to increase of the set up time. 6. Dynamic load testing shall be performed with a minimum load of 10%. 7. R type efficiency slightly less than the Blank type, according to the actual measurement. 8. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to “EMI testing of component power supplies.” (as available on https://www.meanwell.com/Upload/PDF/EMI_statement_en.pdf) 9. The ambient temperature derating of 3.5℃ /1000m is needed for operating altitude greater than 2000m(6500ft). ※ Product Liability Disclaimer : For detailed information, please refer to https://www.meanwell.com/serviceDisclaimer.aspx

Function manual

1.The output voltage can be adjusted

DIP Switch Settings	UDP-300-4.2	UDP-300-4.6	UDP-300-5	
 Factory default	4.2V	4.6V	5.0V	Fixed output
	4.1V	4.5V	4.9V	Fixed output
	4.0V	4.4V	4.8V	Fixed output
	3.9V	4.3V	4.7V	Fixed output
	3.8V	4.2V	4.6V	Fixed output
Other Setting	X			Incorrect Mode Not recommend

Note: It is recommended to adjust the DIP switch with the power off.

2.Redundant function

- UDP-300R is built-in redundant function and can be connected 2 units in parallel .
- When in parallel operation the maximum load should not be greater than the rated power of any PSU.

■ Installation**1. Operate with additional aluminum plate**

In order to meet the "Derating Curve" and "Static Characteristics", the UDP-300 series must be mounted on an aluminum plate (or cabinet of equivalent dimensions) at its bottom side. The recommended dimensions of the aluminum plate are shown below. To optimize thermal performance, the aluminum plate shall feature a flat, smooth surface (or be applied with thermal grease), and the UDP-300 series must be firmly mounted at the center of this aluminum plate.
